

Founders Associate (m/w/d)

Do you want first-hand entrepreneurial experience of building corporate solutions for a low-carbon and climate resilient economy? Are you keen to run both business operations and technical analyses? And do you want to take a front-row seat in a start-up company? Then this position might fit.

You are:

- Hungry to dive full-speed into building corporate solutions for the climate and environmental challenges of our time
- Data savvy to translate climate policy into business action in companies in industry, energy, buildings, transport and/or agriculture & forestry
- Hands-on and pragmatic having demonstrated how to make things happen – optimally with experiences from the corporate world
- Fluent communication skills in English and German and confident to handle customers and service providers in the German market
- A university graduate with a degree in agriculture, economics, engineering, natural sciences, law or political sciences

You want:

- First-hand entrepreneurial experience of running a business in the data science and climate-space
- To build things: from gaining customers and financing, over forming team and work processes to developing analytical solutions and products
- A dynamic work environment where you balance analytical work with operative tasks to develop both technical and project management skills
- A flexible role (based in Berlin), in which you can arrange your working hours and location(s) to fit your personal needs
- A dynamic and collaborative work environment where diversity, openness and trust are our core values

We offer:

- A broad range of tasks from product and business development to analytical and consulting work

- A flexible role that can develop in many directions depending on what you get to roll with
- A seat next to our leadership team with a full view on all strategic and day-to-day issues and insights into the joys and pitfalls of starting a business
- A hybrid work environment with a working space at the heart of Berlin-Kreuzberg
- A competitive fixed salary in the startup sector

We are:

- A boutique advisory firm guiding organizations of all sizes and industries through climate regulations, carbon markets, and green technologies
- Strategic enablers of green transitions by making the economics of carbon count in business strategy and financials
- Data-driven analysts who bring together business-relevant data on climate policy, carbon pricing and green markets
- Trusted advisors who make tailored business solutions from overarching strategies over financial optimization to reporting tools
- A young and growing team with a track-record in management consulting, energy industry, finance, and international climate policy (UN and World Bank)
